### Summary

This report presents key figures from the Norwegian Aquaculture Industry. The report contains information about all species framed in Norway.

The information is grouped in four groups. Where one group contains information about Atlantic salmon and Rainbow trout. Another group contains information about other fish species than salmon and trout, a third group contains information about molluscs, crustaceans, and echinoderms and finally the fourth group contains information about algae.

## 7. Losses in the production

### Definitions:

- Dead fish: Number fish physically taken out of the bag-net. Cause of this type of death could be illness, wounds etc. without clearly specifying the cause.
- Turn out from slaughterhouse: Number of fish discarded at slaughterhouse due to maturity, defects, blemishes etc.
- Escapes: Number of fish that have escaped in conjunction with an accident.
- Other losses: Number of fish lost due to predation, theft, counting mistakes and other causes.
