

Attachment I. (maps)

Chart of the investigation area and the preliminary cruise track of PS111 (black line). Red dots: CTD/water sample station, PIES, as well as oceanographic moorings deployment and/or recovery sites. Red line: Area of research interest. Sediment cores will be taken near a CTD station on the Antarctic continental shelf. SUI T and M-RMT trawls will be conducted south of 60°S at suitable locations along the cruise track.

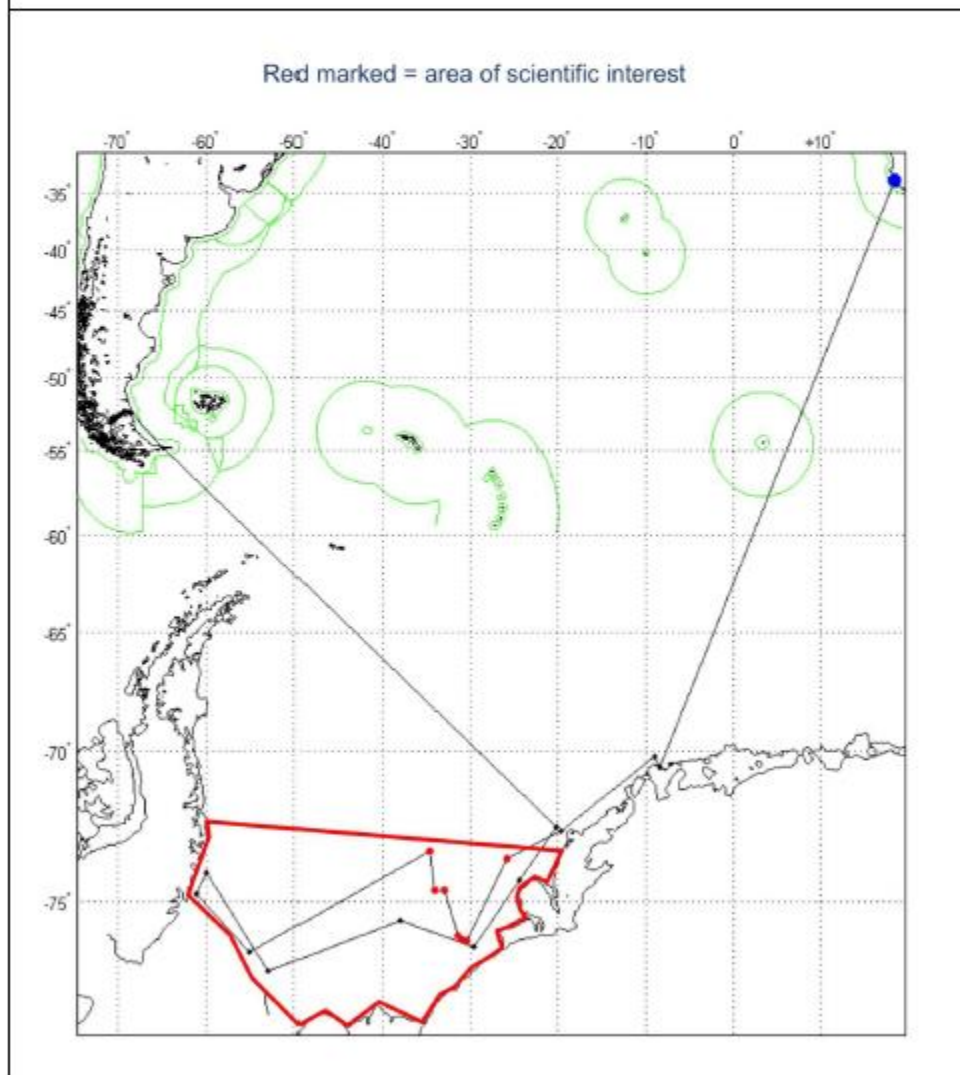

Chart of Cape Town area and the preliminary cruise track of P S111 (orange line).
