

Maps shows proposed sampling stations and survey tracks for all nations participating in the IESSNS 2020. Geographical work area of the Icelandic vessel is within the area defined by the blue polygon. Locations of surface trawl stations, CTD and plankton sampling (open circle with a dot in centre) and survey tracks (yellow solid lines).

**5. Types of samples required, e.g. Geological/Water/Plankton/Fish/Radioactivity/ Isotope and methods by which samples will be obtained (including dredging/coring/drilling):**

Fish sampled by pelagic trawl for biological data and abundance estimate (standardized surface trawling). Water samples by water bottles. Plankton by plankton nets.
